Managing Male Infertility **TOGETHER**

16 NOV | 2023

📍 Millennium Airport Hotel Dubai

EVENT **BOOKLET**

MANAGING MALE INFERTILITY **TOGETHER**

A WARM WELCOME FROM THE CONFERENCE CHAIR

Dear Colleagues,

On behalf of the UroAndrology Conference organizing committee, it is with great pleasure that I extend a very warm welcome to all participants.

The theme of our conference, "**Managing Male Infertility Together,**" reflects the pressing need to address the challenges and advancements in the field of UroAndrology. This conference provides an exceptional platform for experts to share their insights, research findings, and best practices. We believe that this collaboration will be instrumental in driving positive changes in the field.

Our conference aims to foster collaboration, disseminate groundbreaking research, and promote an open exchange of ideas among experts in the field. By engaging in meaningful discussions, attending insightful sessions, and connecting with fellow colleagues, we hope to inspire innovative solutions and strategies for managing male infertility.

On a final note, I am indeed delighted and honored to chair the UroAndrology Conference. I hope that we all find it an enjoyable and exciting event to enrich and consolidate our knowledge on Male infertility management updates and challenges.

More importantly, don't forget to take full advantage of the networking opportunities and the chance to catch up with previous friends and colleagues, as well as make new acquaintances. Building and nurturing professional relationships is a cornerstone of progress in our field, and this conference provides the perfect setting for such interactions.

Once again, I extend my warmest welcome to each and every one of you. Let's come together to make this UroAndrology Conference an unforgettable experience filled with learning, collaboration, and lasting memories.

Sincerely,

A handwritten signature in black ink, reading "Bohaira El Geyoushi".

CHAIRPERSONS

Dr. Bohaira El Geyoushi

Head of IVF Department,
Consultant Gynaecologist & Reproductive Medicine (IVF)
Dr Sulaiman Al Habib Fertility Centre, Dubai

Dr Bohaira El Geyoushi is the Head of the Department and Fertility Clinical Lead at Dr Sulaiman Al Habib Fertility Centre, Dubai. She is a Consultant Gynaecologist & Reproductive Endocrinology (IVF) in Dubai for the past ten years. Prior to that, she was a consultant and Head of the Fertility Department at East Kent University Hospitals NHS Foundation Trust, the second largest in the UK. Dr Bohaira is a Fellow of the (RCOG) Royal College of Obstetricians & Gynaecologists and a Fellow of the (FSRH) Faculty of Sexual & Reproductive Healthcare in London/UK. She was awarded a Doctorate of Medicine from the University of Southampton on "Studies in Women's Reproductive Healthcare". This generated research publications and she is widely published with many peer-reviewed publications.

Dr. Bohaira worked in many reputable medical centres in Dubai, UK. She was awarded the Adjunct Assistant Professor Position at Feinberg School of Medicine, Northwestern University Chicago, USA. She is quite passionate about her work and believes in a holistic approach to women's healthcare and fertility management. Dr Bohaira strongly believes in the power of education and knowledge and in empowering women with knowledge about their fertility so they can make informed decisions and choices about their reproductive health.

Dr. Robert Bader

IVF Lab Director,
Dr Sulaiman Al Habib Medical Group (HMG), Dubai

Dr. Robert Bader, is the IVF Lab Director at Dr. Sulaiman Al Habib Medical Group (HMG), Dubai. Dr Robert embarked on an educational journey that has spanned over a decade. His academic journey commenced with a profound exploration of human reproduction and infertility, culminating in his first MSc degree, followed soon after with the study of Regenerative Medicine and Stem Cells, earning a second MSc degree. He soon followed this with a PhD in Biological and Medical Sciences. With 13 years of experience in the region in several countries, Dr Robert has an excellent track record for pioneering research and clinical excellence.

EXPERT SPEAKERS

Dr. Hussein Kandil

Specialist Urologist, Fakh IVF Fertility Center, Abu Dhabi

Dr. Hussein Kandil, MBBCh, FACS, MBA is urologist specialized in male reproductive and sexual medicine, he currently runs the male reproductive unit at Fakh IVF Fertility Center in Abu Dhabi (UAE) and is the andrology section Coordinator at the Arab School of Urology. He obtained his urology diploma from Balamand University in affiliation with the division of urology at St. George Hospital University Medical Center (Lebanon). His residency included training at the urology divisions of Pontoise Regional Hospital and Lens Teaching Hospital (France). This was followed by a traveling Fellowship in Andrology at the University of Illinois at Chicago (USA), with clinical training in the vast array of male reproductive medical and microsurgical treatments. Further, he earned the Fellowship of the American College of Surgeons (FACS). Later, he graduated with Distinction earning a master's degree in business administration (MBA) from the University of Strathclyde, UK.

During his years of practice, he was among the first to perform micro-dissection TESE for patients with non-obstructive azoospermia in Lebanon. Dr. Hussein Kandil authored male infertility books and co-authored several book chapters in the field of male infertility. His areas of expertise includes the microsurgical techniques in andrology including micro-dissection TESE and microsurgical varicocele ligation, in addition to the management of male reproductive endocrine disorders.

Dr. Mohamed Elkhoully

Consultant Urologist, Medcare Hospital & Clinics, Dubai

Dr. Mohamed Elkhoully is a European board-certified Urologist specialising in the diagnosis and treatment of urologic diseases, prostate ailments, andrology and male infertility, and specialises in advanced minimally invasive treatments for prostate enlargement, including laser vaporization of prostate and microscopic varicocelectomy and laparoscopic surgeries of urology.

Internationally, Dr. Elkhoully obtained his Fellowship of the European Board of Urology (FEBU) in 2006 and that was followed by the Clinical Endourologic fellowship from Heidelberg University in Germany in 2008. Relocating from the Gulf region, he worked as a Urology Consultant at a specialised Urology & Andrology facility in the Middle East – Elaj Group between 2006 – 2009. Moving on to Zulekha Hospital in Dubai, Dr. Elkhoully was the key Urology Surgeon there until 2014. He was also the Head of Urology Department at the prestigious Saudi German Hospital –Dubai in 2015. Dr. Elkhoully is a member of several well-reputed and internationally recognised associations; most notable of which are the American Urological Association (AUA), the European Association of Urologic Surgery (EAU), and the Emirati Association of Urology.

EXPERT SPEAKERS

Prof. Aboubakr Mohamed Elnashar

Consultant of IVF & ICSI in
Delta Fertility Center & Benha Fertility Center, Egypt

Dr. Aboubakr Mohamed Elnashar is a Professor of Obstetrics and Gynaecology at Benha University Hospital in Egypt. With a wealth of expertise in the field, he has also been recognized as the President of the Clinical Society of Obstetrics and Gynaecology. Dr. Elnashar's commitment to advancing the field of reproductive health is underscored by his membership in the Egyptian Board of Fertility Sterility Society and his extensive postgraduate qualifications, including a Master's degree in Obstetrics and Gynaecology from Zagazig University, a Diploma in Cervical Pathology from Barcelona, Spain, and a Doctorate in Obstetrics and Gynaecology from Zagazig University.

In addition to his academic roles, Dr. Elnashar has made significant contributions as an editor to prominent medical journals such as the Middle East Fertility Society Journal, Egyptian Fertility Sterility Journal, and Benha Medical Journal. His prolific research career is highlighted by 41 international publications in medical journals like Lancet, Human Reproduction, British Journal of Obstetrics and Gynaecology, Fertility Sterility, and others.

Dr. Elnashar's contributions extend to the realm of literature, with co-authorship of several books, including "Gynaecology for Medical Students," "Obstetrics for Medical Students," and "ABC of Reproductive Endocrinology," among others.

Diagnio is a UAE-based HealthTech startup revolutionizing hormonal and fertility diagnostics for women. Prioritizing women's experience, Diagnio offers innovative, digitally powered test systems to provide accurate insights into reproductive health in the comfort of one's home. Globally, 30 million women struggle with fertility challenges annually. In the Gulf region, the infertility rate exceeds 40%. Yet, infertility is not considered a disease until 1 or 2 years of unsuccessful attempts, largely due to limited access to early screening. Diagnio's mission addresses this gap, providing an accessible, cost-effective solution ensuring privacy, accurate diagnostics, and timely fertility issues detection.

Diagnio's first product - Smart Ovulation Test Kit - has the perfect combo to provide accurate insights into cycle phases and ovulation. Diagnio Ovulation Microscope measures estrogen levels in a woman's saliva, while Diagnio App interprets the results, offers AI-powered personalized recommendations, and has features to assess infertility risk factors (stress and energy levels assessment, diabetes predisposition, etc.)

MIRI[®] Time-Lapse Incubator

MIRI[®] TL is a Time-Lapse incubator that monitors embryo development. The MIRI[®] TL, optimized for clinical and IVF procedures, is designed to support existing work and quality assurance routines. This value-added treatment provides the most unique incubation environment with the market's most secure and safest procedures. It lessens disturbance and minimizes stressful factors that may be introduced when taking the dishes out of the incubator. This incubation system also ensures predictability in the daily handling and currently offers the market's lowest cost of ownership.

Unique Incubation Environment

- Has independent multi-chamber system
- Gas recirculation through HEPA/VOC filters and UV light.
- Built-in gas mixer. Premixed gas is not required.

MIRI[®] TL6: 6 Individual chambers

Gas recovery: less than three (3) minutes

MIRI[®] TL12: 12 Individual chambers

Temperature recovery: less than one (1) minute

Unprecedented Faster Recovery

- Excellent recovery time for both temperature and gas parameters.
- Opening one chamber will have no impact on the rest of the system.
- Heated upper lid and bottom plate for excellent temperature regulation and uniformity.

2 Temperature Mode Options:

- **Single:** Uniform set points for all 6/12 (six/twelve) chambers.
- **Multi:** Individual set points for each chamber.

Sophisticated Annotation Tools

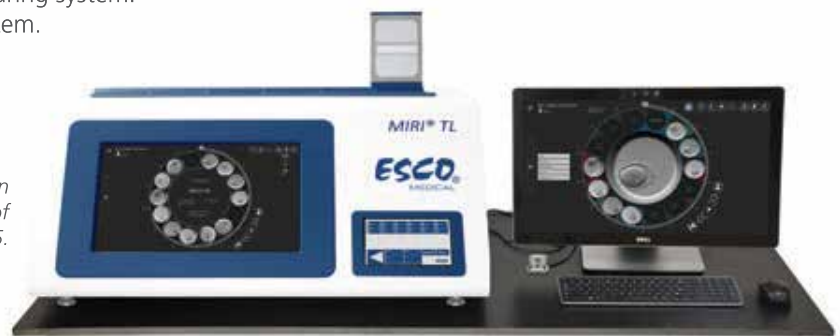

- Freedom to personalize instrument and parameter settings.
- Do a side-by-side comparison and compare actual timings to ideal.

Quality checking an easy breeze!

- Has 6/12 temperature sensors to ensure constant temperature stability.
- Independent PT1000 sensor and gas sample port for external validation for each chamber.
- Built-in pH measuring system.
- Data logging system.

This equipment is a CE-marked device and is in conformity with the essential requirements of the medical devices EU regulation 2017/745.

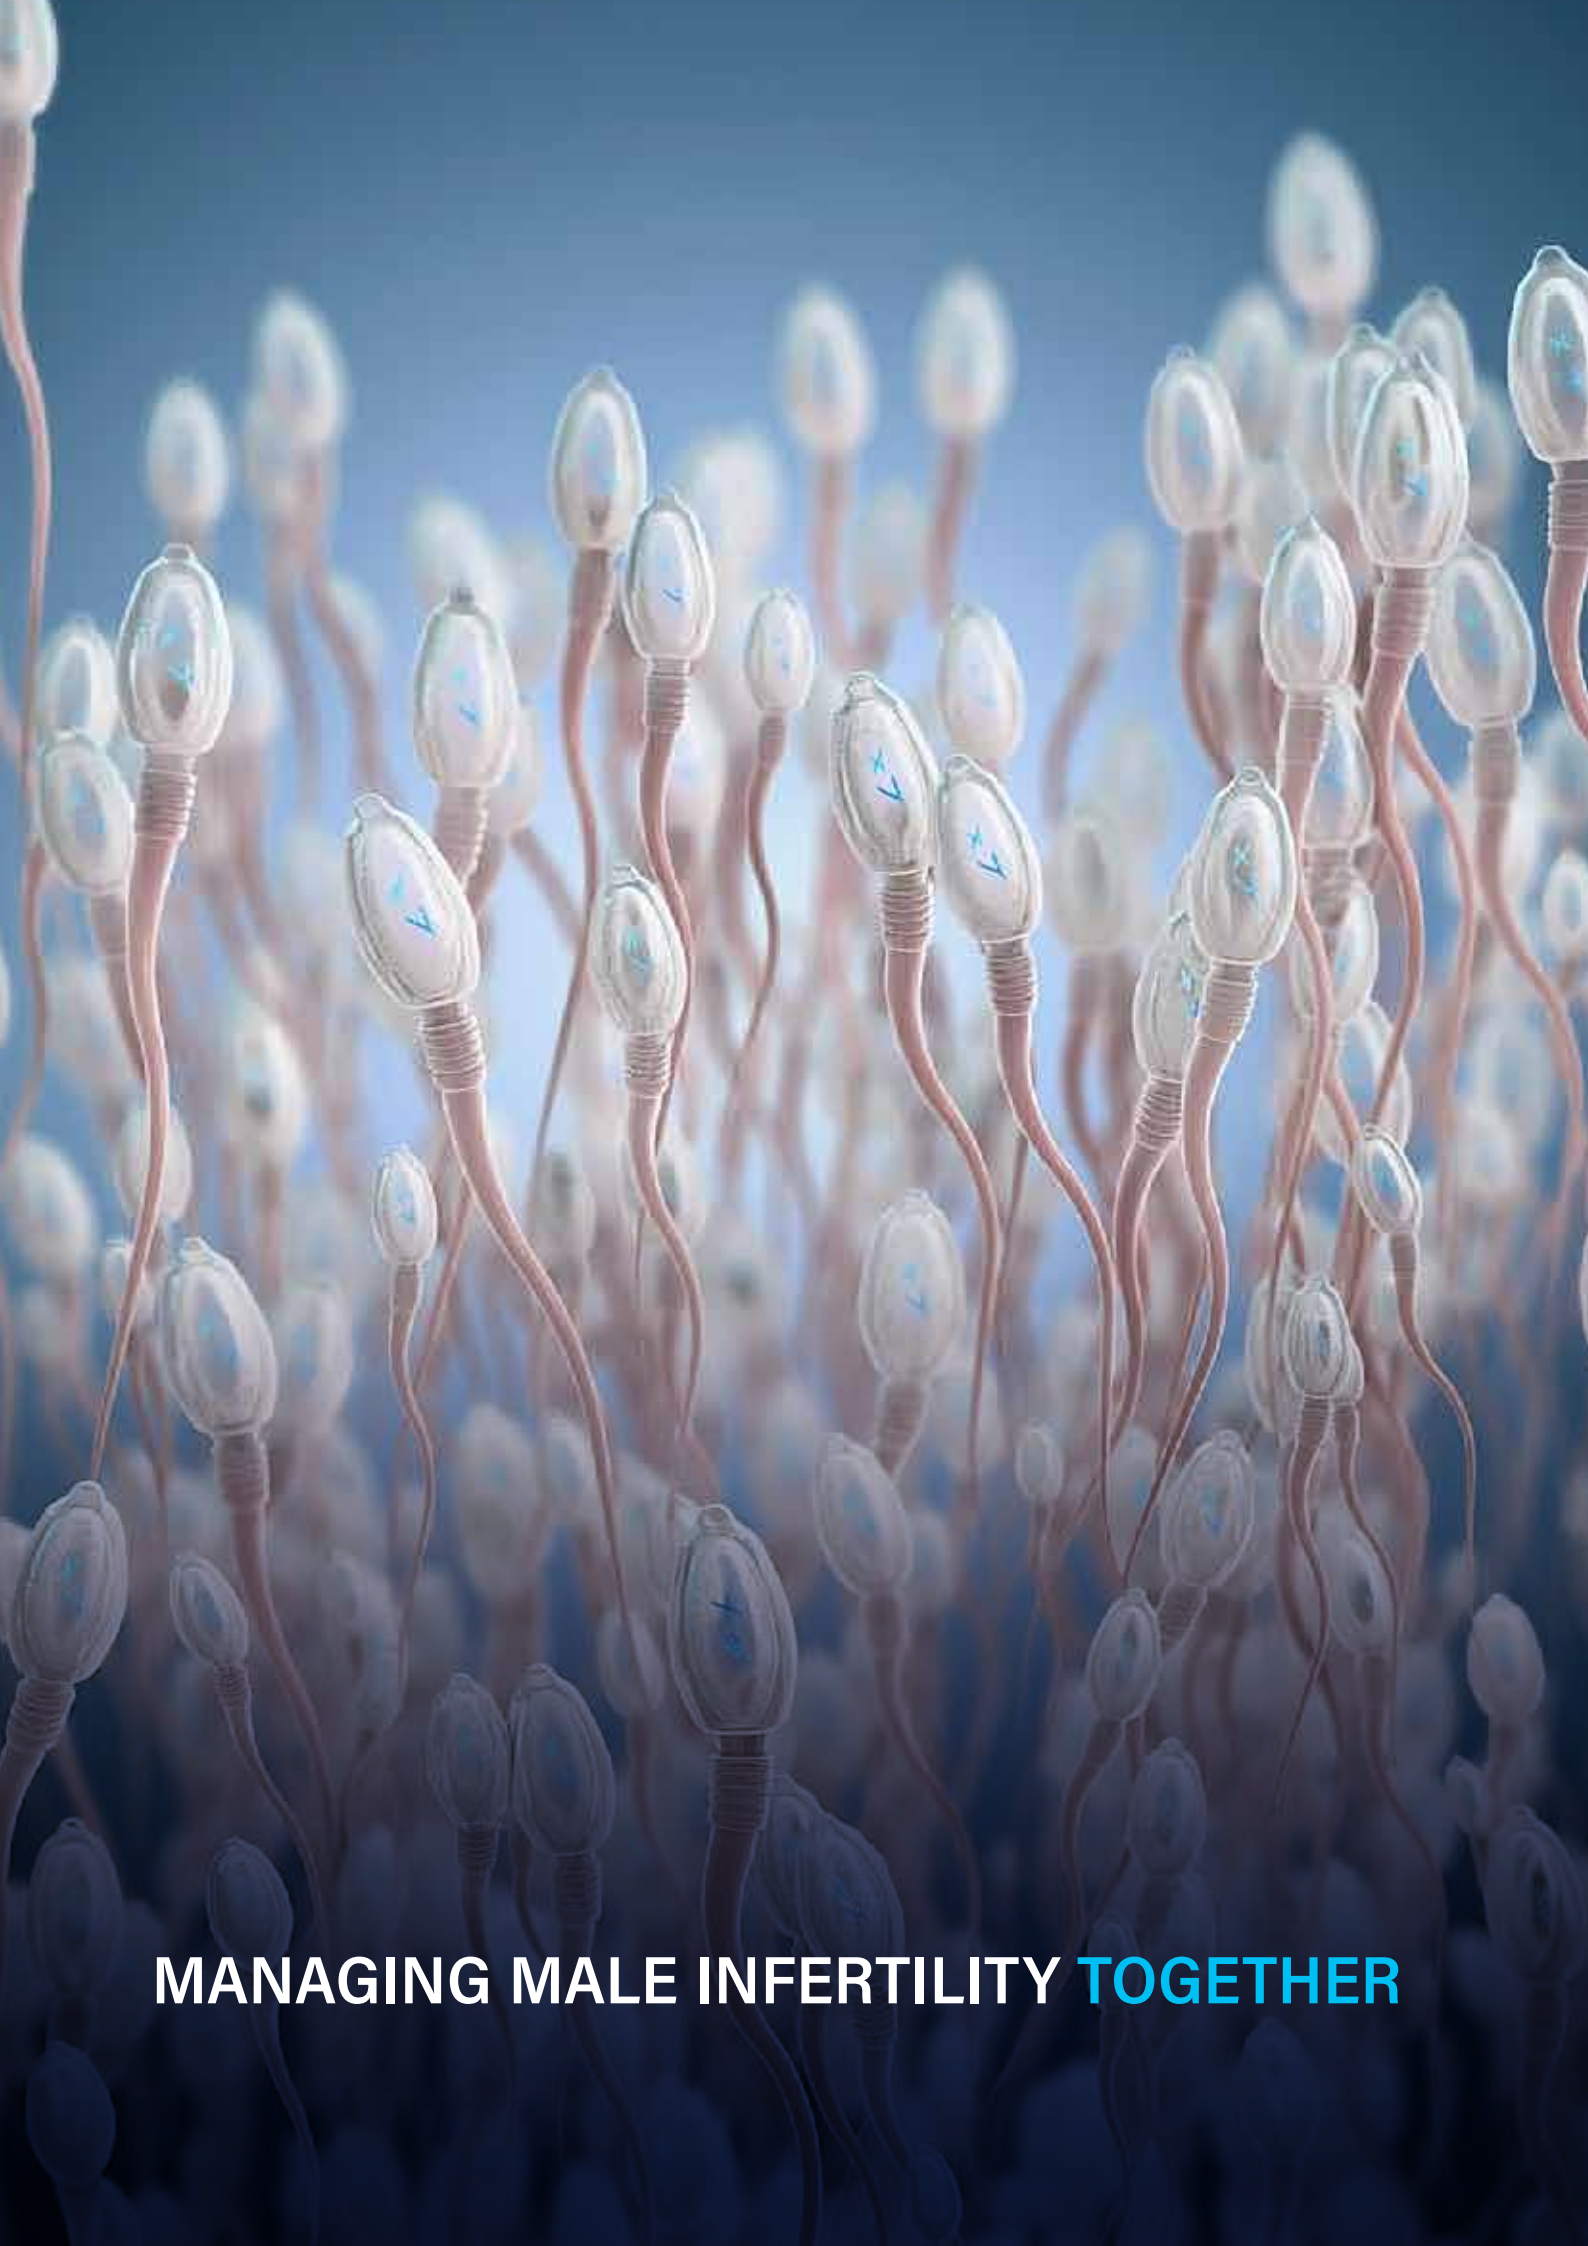

Embryo Analysis and Evaluation System

The MIRI[®] TL Viewer Software is a simple yet sophisticated information-providing tool that can help embryologists process the data generated. You can review, annotate and compare the morphokinetic parameters of each embryo to select or deselect embryos for transfer and export data for retrospective analysis.

Navigation through the stacked timeline is easy and intuitive as the revolver shows the videos of the 14 wells of one single CultureCoin[®]. You can play the individual videos, annotate and compare each single embryo.

Shown on the image is a magnified view of embryo #3
